## DESCRIPTION

HD Conventional sprinkler is designed for standard installation. The design incorporates state-of-the-art, heat responsive, frangible glass bulb design (standard or quick response) for prompt, precise operation. The sprinkler body is made of brass forging copper alloy (DZR). This sprinkler is available in various temperature ratings (see Sprinkler Ratings) and finishes to meet many design requirements.

All HD Sprinklers are manufactured using the time proven Belleville seal used exclusively by all major manufacturers to ensure long life and safe operation. Escutcheon plate adjustment provides convenience in Pendant Sprinkler installation in case of areas with finished ceilings or walls. It directs from 40% to 60% of total water initially in a downward direction.

## SPRINKLER RATINGS

| SPRINKLER TEMP. CLASSIFICATION | NORMAL SPRINKLER TEMP. RATING | NFPA MAX. CEILING TEMP. ALLOWED | GLASS BULB COLOUR |
|--------------------------------|-------------------------------|---------------------------------|-------------------|
| Ordinary                       | 57°C (135°F)                  | 38°C (100°F)                    | Orange            |
| Ordinary                       | 68°C (155°F)                  | 38°C (100°F)                    | Red               |
| Intermediate                   | 79°C (175°F)                  | 66°C (150°F)                    | Yellow            |
| Intermediate                   | 93°C (200°F)                  | 66°C (150°F)                    | Green             |
| High                           | 141°C (286°F)                 | 107°C (225°F)                   | Blue              |

As per Table 6.2.5.1 NFPA 13

| MATERIAL SPECIFICATION |   |
|------------------------|---|
| Deflector              | Brass   |
| Bulb                   | Glass   |
| Load Screw             | Brass   |
| Frame                  | Brass   |
| Seal                   | Belleville Washer coated on both sides with Teflon Tape |
| Bulb Nominal Diameter  | Standard Response 5.0mm<br>Quick Response 3.0mm         |

# CONVENTIONAL SPRINKLER (STANDARD & QUICK RESPONSE)

## SPRINKLER OPERATION

The Sprinkler operating device is state-of-the-art heat responsive frangible glass bulb supplied by a world leader in this innovative technology. The glass bulb contains fluid which expands when exposed to heat. When the rated temperature is reached, the bulb shatters and water flows through the sprinkler and strikes deflector, forming a uniform water spray pattern to control or extinguish fire.

Standard spray coverage is up to:

Light Hazard = 196 square feet (18,2 sq.m);

Ordinary Hazard = 100 square feet

(9,3 sq.m) as per NFPA 13.

## CARE AND HANDLING

Sprinklers must be handled with due care, they must be stored at ambient temperature for best results. Storage as well as any onward shipment is to be made in original packing only. Sprinklers must be visually inspected carefully before installation. Sprinklers visibly damaged, dropped or exposed to temperature in excess of the maximum ambient temperature permitted, should never be installed. Never install any glass blub sprinkler if the bulb is cracked or if there is a loss of liquid from the bulb. Sprinkler must be installed after the piping is in place to prevent mechanical damage.

Use Teflon Tape or soft thread sealent on male thread of the Sprinkler for the leak tight Sprinkler joint.

A leak-tight 1/2" NPT/BSPT Sprinkler joint should be obtained by applying maximum torque of 19.0 N-m (14 lb-ft). Excessive tightening torque may distort the Sprinkler inlet and cause leakage. Sprinkler must never be painted, plated or coated after they leave factory.

The HD Sprinkler described herein must be installed and maintained in accordance with the latest edition of HD technical data, latest standard of National Fire Protection Association (NFPA) or to the standard of any other authorities having jurisdiction. The owner is solely responsible for maintaining their fire protection system and device in proper operating condition.

Exposure to ultraviolet or direct sunlight for extended period may cause the liquid dye in glass bulb to fade or lose colour. Colourless or faded coloured bulbs are not a problem, as long as the fluid level has not been affected. The loss of colour in the liquid will not effect sprinkler performance, as long as the bulb is intact and not damaged. The loss of colour may be an issue in identifying sprinkler temperature rating, but the temperature rating is still stamped on the sprinkler deflector.

## INSPECTION, TESTING AND MAINTENANCE

Refer to NFPA 25 for inspection, testing and maintenance requirement or to the authority having jurisdiction. For details of warranty, refer HD's current price list, conditions of sale or contact HD sales directly.

## LIMITED WARRANTY

HD FIRE PROTECT PVT. LTD. hereby referred to as HD FIRE warrants to the original purchaser of the fire protection products manufactured by HD FIRE and to any other person to whom such equipment is transferred, that such products will be free from defect in material and workmanship under normal use and care, for two (2) years from the date of shipment by HD FIRE. Products or Components supplied or used by HD FIRE, but manufactured by others, are warranted only to the extent of the manufacturer's warranty. No warranty is given for product or components which have been subject to misuse, improper installation, corrosion, unauthorized repair, alteration or un-maintained. HD FIRE shall not be responsible for system design errors or improper installation or inaccurate or incomplete information supplied by buyer or buyer's representatives. HD FIRE will repair or replace defective material free of charge, which is returned to our factory, transportation charge prepaid, provided after our inspection the material is found to have been defective at the time of initial shipment from our works. HD FIRE shall not be liable for any incidental or consequential loss, damage or expense arising directly or indirectly from the use of the product including damages for injury to person, damages to property and penalties resulting from any products and components manufactured by HD FIRE. HD FIRE shall not be liable for any damages or labour charges or expense in making repair or adjustment to the product. HD FIRE shall not be liable for any damages or charges sustained in the adaptation or use of its engineering data & services. In no event shall HD FIRE's product liability exceed an amount equal to the sale price. The foregoing warranty is exclusive and in lieu of all other warranties and representation whether expressed, implied, oral or written, including but not limited to, any implied warranties or merchantability or fitness for a particular purpose. All such other warranties and representations are hereby cancelled.

## NOTICE:

The equipment presented in this bulletin is to be installed in accordance with the latest publication standards of NFPA or other similar organisations and also with the provision of government codes or ordinances wherever applicable. The information provided by us is to the best of our knowledge and belief, and consist of general guidelines only. Site handling and installation control is not in our scope. Hence we give no guarantee for result and take no liability for damages, loss or penalties whatsoever, resulting from our suggestion, information, recommendation or damages due to our product. Product development is a continuous programme of HD FIRE PROTECT PVT. LTD. and hence the right to modify any specification without prior notice is reserved with the company.
